

UNITED REPUBLIC OF TANZANIA
PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

UKEREWE DISTRICT COUNCIL

Council Strategic Plan for 2008/2011

Prepared by:
The District Executive Director,
Ukerewe District Council,
P.O. Box 41,
NANSIO/UKEREWE.
Tel/Fax 028 2515021
e-mail: ukerewedc@yahoo.com

March, 2008

PREFACE

STATEMENT OF COUNCIL CHAIRPERSON

The preparation of this Strategic Plan for 2008/2011 considered the existing problems and needs to cater Management Overhead and Development Obligations with the focus of improving people's welfare through enhanced Good Governance and Provision of quality goods and services to the people.

This Strategic Plan includes priority Development and operational objectives on key areas of service delivery with high priority in social- economic services and other cross cutting issues. These key areas are geared at the implementing the ruling party manifesto as it was pledged in the year 2005.

The District Executive Director and his Technical Team will adhere to implement all activities for Effective control of funds and accountability

MARCH, 2008

**HON. ALLY HAMIS MAMBILE
COUNCIL CHAIRPERSON
UKEREWE DISTRICT COUNCIL**

EXECUTIVE SUMMARY

Ukerewe District Council Strategic Plan for 2008/2011 had been prepared following the National Plan Guidelines issued by the Ministry of Planning Economy and Empowerment (MPEE) it was prepared in line with MKUKUTA.

This Strategic Plan provides direction and guidance to council staff and other stakeholders on how they should go about implementing planned activities. Apart from showing the activities planned for implementation and the services to be delivered during the year, also enable monitoring and evaluation as the execution of the plans and budgets progresses.

It is expected that this Strategic Plan will increase impetus in the implementation of MKUKUTA and ensure that resources are allocated in areas that have rapid multiplier effects and increased income for Kerewe people.

I beg to submit,

Dr. Leonard Mosses Masale
DISTRICT EXECUTIVE DIRECTOR
UKEREWE DISTRICT COUNCIL

CHAPTER ONE

1.0 INTRODUCTION:

1.1 Approaches in Preparing the Strategic Document

The council undertook the following activities.

- a) Firstly, the strategies, and performance indicators that were developed by the stakeholders in the second stakeholders workshop were firmed. This was an important exercise since the output from the stakeholders was not comprehensive enough and it lacked informed knowledge on current policies and national priorities.
- b) A team approach was used where all heads of departments, units and sections met for six consecutive days to discuss and refine the strategies and indicators and assess their practicality and resources required.
- c) Through team approach data was also reviewed to ensure availability and currency of the available data.
- c) A SWOT analysis was undertaken to establish the strengths, weaknesses, opportunities and existing threats or constraints with a view that the council could make optimal utilization of the strengths and existing opportunities and at the same time devise mechanisms for addressing the weaknesses and threats.
- d) Value for money exercise and cost benefit analysis was also carried out with a view to establish the cost effectiveness and economic gains of the proposed service delivery options.
- e) Possible financial sources were also established and discussed, and members were of the view that it was high time the council made use of the Local Authorities Loans Board and or other financial institution from which loans can be secured.

Field work was not undertaken at the initial stages since it was not possible due to time constraint. Baseline data and reference materials obtained from Council Resource Centre.

1.2 Purpose of the Plan

Is to ensure that all Financial Resources of Ukerewe District Council closely continue to be tied to the implementation of various activities from 2008-2011.

1.3 Background to the Strategic Planning Process

Ukerewe DC like all other LGAs in Tanzania is therefore an implementing agency of the national development vision 2025 and had to equip itself so as to be able to deliver the goals and objectives. Through the LGRP the council has been undergoing a restructuring process so as to be better placed to perform. In this process a number of activities have been accomplished including:

- Formation of a council reform team,
- Holding a first stakeholders' workshop to communicate the reform and start the change process,
- Collection of baseline data, assessment of the external environment, review of national policies, legal and institutional framework and carrying out a stakeholder survey,
- Analyzing the data and preparing a situational analysis report, and
- Initiating the strategic planning process through the second stakeholders' workshop.

The second stakeholders' workshop was able to develop a **vision** and **mission** for the council. In addition, the stakeholders were able to identify performance gaps, set goals, objectives and strategies, carry out an analysis of enablers and obstacle, formulate service delivery options (i.e. privatization and or outsourcing) and identify quick wins. After the stakeholders' workshop the CRT and or CMT and other staff were supposed to complete the strategic planning process by producing a strategy document for the council.

1.4 Structure of the Document

The Document has been divided into five Chapters.

Chapter one is an Introduction

Chapter two sets out Situation Analysis

Chapter three presents Mission, Vision and Objectives

Chapter four provides Strategies and Targets

Chapter five looks at Performance Indicators

Appendices have been added to provide more detailed Data:

Appendix A: Organization Chart

Appendix B: References

Appendix C: Action Plan for Implementing.

1.5 The District Profile

Ukerewe district is one of the eight districts of Mwanza region. The district is composed of islands in Lake Victoria and is located between Longitudes **31° 30'** and **32° 5'** East and Latitudes **1° 30' and 2° 20'** South. There are about 38 islands where the biggest is Ukerewe and the district headquarters are located in the town of Nansio. Out of the 38 islands only 15 are permanently inhabited while the rest are only inhabitable temporarily. The district is located to the North of Mwanza city and the districts of Ilemela and Nyamagana while to the East is Mara region. To the South East is Magu district and to the West is Sengerema district.

The district covers an area of 6400 km² out of which 640 km² is land and the rest of the area is covered by the waters of Lake Victoria. The distribution of the land areas as per the existing islands is as follows:

Island	Area(km²)
Ukerewe	494
Ukara	80
Irugwa	13
Bwiro/ Busumba	10
Kamasi	5
Sizu	4
Kweru	4
The rest	30
Total	640

The district is topographically undulated, consisting of small hills, valleys/low lands and seasonal rivers most of the hills are bare due to deforestation. The plains dominate in the district and they constitute the largest area for agricultural land. The low lands are used for paddy and potatoes production. There are seasonal streams in the islands of Ukara and Ukerewe which drain into Lake Victoria during the rainy season. In addition

to the 38 islands, geographically Ukerewe district is characterized by small hills and lowlands. The altitude ranges from **1150 to 1667** meters.

Climatically, there are two agro-ecological zones in the district namely, the Eastern and Western zone. The district has moderate warm climate with temperature ranging between 21°C and 28°C throughout the year. The Eastern zone has short growing period extending from October to May with four humid months while Western zone has longer growing season extending from September to July with a humid period of five to six months. Rainfall is more in the west (1800mm) than the East (900mm). Consequently, two different agricultural zones are distinguished, with different planting seasons. The first rains occur between October and January and the second between March and May. Over the past five years (2001 to 2004) trends in rainfall were as follows.

Year	Rainfall in mm
2000	798.8
2001	1247.6
2002	1302.6
2003	947.7
2004	1320.8

Humidity is low with a minimum of 35% at the end of dry season and maximum of 60% at the end of the wet season. The fertility of the soils is generally poor and this can be attributed to poor parent material, soil management and high rainfall that accelerate leaching of nutrients. There are however, great variations in the soil fertility status in different parts of the district. Relatively, fertile soils are found in the lowlands and the western parts of the district.

The vegetation cover of the district is mainly bushes and shrubs due to many years of deforestation. However, there are Caribbean pine forest at Rubya, natural forest and eucalyptus reserves at Kabingo, The Itira catchments indigenous forest, Mukigagi catchments and plantation forest (Misira and indigenous tree) and Bumbire catchments indigenous forest.

Administratively, the district is divided into four divisions namely Mumbuga, Mumlambo, Ilangala and Ukara. There are 24 wards which are subdivided into 74 villages. The Administrative headquarter of the district is at Nansio which also serve as the main gateway into and out of Ukerewe.

1.5.1 Information on Population, Culture and Peoples of Ukerewe

According to the population census of 2002, Ukerewe district had a population of 260,831 people. Out of these, 128,842 were males and 131,989 were females. The population growth rate is 2.9% which is higher than the national average of 2.6%. The district has a population density of 408 persons per Sq km. Dependency ratio was 97, sex ratio (Number of Males per 100 Females) was 98 and Average Household Size (Person per Household) was 6.2. However based on the 2.9% growth rate, the current population is estimated to be 276,179 people where 139,756 are females and 136,423 are males. The distribution of the population in inhabitable islands is as follows

Island	No. of villages	Male	Female	Total
Ukerewe		101,166	107,931	209,097
Ukara	8	13,353	12,757	26,109
Irugwa	2	4,493	3,544	8,037
Bwiro	1	3,007	2,296	5,303
Kamasi	1	3,936	2,932	6,868
Sizu	2	1,028	917	1,945
Kweru	1	1,859	1,612	3,471
Total Population		128,842	131,989	260,831

The predominant tribes in Ukerewe district are the Kerewe, Kara and Jita. Historically the Jita are said to have come from Mara region. There are moreover a number of other tribes including among other the Sukuma, Haya, Kurya, Ha, Chagga and Luo.

Culturally, the people in Ukerewe are patrilineal where the men pay bride prices to the parents of their wives. Bride prices can be paid in form of money or livestock or both. In terms of religious beliefs Christianity and Islam constitute major religions. There are a number of Christian denominations including the Roman Catholic church, Seventh Day Adventist, Assemblies of God, African Inland church, Jehovah Witnesses, and the Church of Followers. Some people are neither Christian nor Moslem and are said to follow traditional beliefs and practices such as the "KUTAKASWA" ritual and RICHUMU. Some of the traditional beliefs and practices are being discouraged because they have had negative effects to the community. For instance, in the KUTAKASWA ritual when one spouse dies the remaining spouse is supposed to perform sexual intercourse some days after burial with an outsider as way of purifying oneself. It is believed that if *cleansing (kutakasa)* is not done, several deaths will occur among members of the deceased family. This practice however accelerates the spread of sexually transmitted diseases including HIV/AIDS.

1.5.2 Social Economic Activities

The gross domestic product (GDP) for Ukerewe District is calculated at Tshs 130,000 per capital. This is below the poverty line thus making the district among the poorest districts in Tanzania.

92% of the population depends on agriculture (the main employer) which provides the people with food and cash for their day-to-day use. Cassava, potatoes, maize and rice are the main food and cash crops.. Most of these are consumed internally although some are sold to the nearby districts of Mwanza and Bunda in Mara thus bringing some income to the farmers. Other crops grown include millet, sorghum, rosella, bananas, pineapples, paw paws, coffee, oranges, mangoes and vegetables Land ownership is basically characterized by patrilineal ownership and inheritance. Arable land is limited only about 62,000 hectares resulting into the land being overused while little soil enriching nutrients are returned into it.

Smallholder farming is the major occupation for the majority of the people in the district. The farming system is predominantly subsistence. Farming techniques are very traditional where farmers use the hand hoes to clear land, plant and weed their crops. The fast growing population has always had pressure on arable land and subsequently decreasing the land productivity due to declining soil fertility.

The table below provides a summary of crops grown and yield per ton over a seven-year period.

Crops Produced	Yield In Tonnage						
	1997/8	1998/99	1999/2000	2000/01	2001/02	2002/03	2003/04
Cotton	63.6	46.0	17.2	4	10	9.5	1.886
Coffee	163.2	6.0	22	24	55.1	151	155
Cassava	36509	21104	67229	71525	69093	58420	54143.4
Rice	18554	463	990	13169	16243	10746	4219.2
Sweet potatoes	22776	9558	28934	30124	29808	26290	22209
Sorghum/Millet	584	103	294	315	277	67.5	105
Maize	9488	2523	3826	8360	8436	21648	26041.6
Legumes	1400	165	1182	1454	1275	2498	1705
Mangoes	10725	10210	11440	11200	10850	10420	10380
Pineapples	325	320	330	300	350	300	290
Oranges	78700	72400	73700	74000	74100	74050	74050
Lemon	6550	6700	6800	6500	6100	6050	6050

There are three irrigation schemes in the district, which are Bugorola irrigation scheme, which is the largest. It has a potential area of 200 ha of but currently only 74 ha are in use. The scheme mainly produces variety of rice and at the beginning of the dry season some farmers grow sweet potatoes using residual moisture. The other schemes Namagubo and Nakatunguru, which have to be supported by UNDP, were yet to start operating at the time this strategic plan was being prepared.

Livestock farming constitutes an equally important economic activity. Livestock systems can be divided into two categories; indigenous livestock system, which is predominant, and smallholder dairy farming system. There are about 200 households that keep 624 dairy cattle 50% being mainly of Friesian blood. Dairy goats are also kept but these are very few. Both dairy cows and goats are kept on a zero grazing system by a few well to do farmers.

Generally, in households where livestock is available, herds are small and dominated by low yielding. The livestock commonly found in the district include cattle, goats, sheep, pigs and poultry. The local (indigenous) breeds are adapted to the harsh weather conditions and they are disease resistant. Livestock and ownership as per 2003 livestock census was as follows.

Type of livestock	No. of animals	No. of owners	Av. no. of animal/owner
Cattle	54,044	8,814	6
Goats	31,881	3,978	8
Sheep	203	25	8
Pigs	444	17	13
Chicken	216,175	10,000	20
Ducks	130,280	5,000	26
Rabbits	300	18	17
Dairy Cattle	584	207	3
Dairy goats	130	70	2
Guinea Fowls	300	30	10

There are 16 dip tanks located at each ward but they have not been functioning for a long time due to shortage of money for maintenance and repair. Veterinary services are not operating due to lack of equipments. There were veterinary centres at Muriti, Gallu, Bukindo, Bwisya and Lugezi but have since been closed.

Fishing

In addition to agriculture, fishing is another economic activity and is done along the lakeshore and the islands. A total of 19,000 people are estimated to depend (partially) on fishing and or trading in fishing products. Fishing is done on both small and large scales. With the provision of modern fishing facilities (e.g. large engine boats equipped with cold storage facilities), permanent fishing settlements along the shores of the islands have been established. The types of fish caught include among others the Nile perch, Tilapia, Dagaa, Furu, Ngere, Nembe, Mbofu and Ningu. Fishing methods include Gill netting, Dagaa Seining, Long lining, Hand lining and Beach Seining (prohibited by law)

Fishing activities are mostly artisanal (more than 75%) the remaining portion being Semi-industrial. The artisanal fisheries are characterized by the predominance of labour, over capital, the use of small craft, beach seines; few and small mesh size nets, hooks and traps. Artisanal fishing operations are limited to near-shore waters and boats propelled by paddle, sail and small outboard engines.

Fish from artisan fishing is used for subsistence, sold locally to wholesalers/transporters or processing and marketing agency. The semi-industrial fishing operations are characterized by higher capital to labour ratio, the use of larger vessels powered by more powerful outboard engines and boats are generally owned by entrepreneur and managed by salaried crew. Vessels of this type mostly compete directly with artisanal fisher folk in inshore waters in order to cut down operation costs. Harvests from this group are sold to fish wholesalers, processors or packers.

Aquaculture and fish farming in general are not well pronounced in the district due to the fact that fresh fish can reach any given point on the island at a minimal cost. In addition due to the sandy nature of the soils the water retention capacity of the soil is low and fish farming (terrestrial) would not be a self-sustaining economic venture.

Forestry and Wildlife

The district has forests which can provide only 389,870 m³ (cubic meters) of wood annually without causing serious environmental destruction. But the annual wood requirement (firewood only) for the district is estimated to be 720,000 cubic meters. This is an indication that with the growing population, wood requirement will increase even more and create environmental destruction.

Wildlife resources in Ukerewe district consist of:-

- Hippopotamus (in sheltered bays)
- Crocodiles and a variety of reptiles
- Small mammals
- A variety of birds

No quantitative assessment of these resources has been conducted. Unfortunately, wildlife resources receive negative attitude from the community because they compete with the people in the use of the very limited resources. For example, hippos consume

farm produce cultivated near the lake shore while crocodiles are a threat to human life and small mammals on which they feed. Birds are a serious menace to rice and other cereal farm products.

Tourism.

Opportunities for tourism exist but have not yet been exploited nor promoted. Consorted efforts are needed towards promoting tourism in the district so as to improve the economic wellbeing of the peoples of Ukerewe.

Trade and Industries

Urban and semi urban centres within the district are mainly trading centres. Major trading items include industrial goods and agricultural products. Investments made on the industrial sector are still very minimal; only small scale industries are active especially in the areas of milling machines. Others include sawing, carpentry, minor electrical works, and traditional blacksmith. However, the district has potential for big industries including fish and fruit processing.

Communication and transport

In terms of road network the district has a total of 307 km of earth/gravel as detailed in the following table:

Types of Roads	Length
Regional roads	96.0 km
District roads	106.0 km
Feeder roads	105.0 km
Total	307.0 km

The road condition of all these roads is not so bad, but because of frequent soil erosion regular maintenance is necessary. Means of transport within and outside the district can be by the road (surface) or on Lake Victoria using motorboats or ships which are privately owned. Ukerewe District has a total of 307 km of road network. The roads are classified into Regional, District, and Feeder roads. Most of these roads (85%) are earth roads and are in poor condition and become impassable during the rainy season. There are also community roads which constitute tracks and footpaths and form the largest number of the road network in the district but are not properly inventoried.

Marine transport facilitates the movement of people, goods and services from one locality to another. The means of marine transport available in the district are boats, ferry, and out board engines. People particularly those in the Islands face problems to access transport. MV Clarias, MV Butiama and MV Serengeti boat are the main vessels which facilitate the movement of people to and from Mwanza City. MV Sabasaba (ferry) is the one that links Ukerewe and Bunda district in Mara region. However, there is a newly introduced ferry (MV Nyerere) which links the Ukara and Ukerewe Islands. There is also one airstrip with a total earth runway length of 0.9 km.

Communication Network

The communication network and services have of late been improved following an increase in the number of service providers including TTCL, VODACOM, TIGO, CELTEL and ZANTEL.

Power supply

In terms of power supply the district enjoys electricity provided by National Electric Supply Company (TANESCO). The electricity is used for industrial, office and domestic purposes. Like telephone services, electricity is not supplied all over the district. Supply so far is limited to few trading centres that are along the line while demand for rural electrification is very high. UNDP has shown interest in introducing solar energy system in rural areas.

Financial institutions

There are a limited number of financial institutions within the district including the National Micro Finance Bank 1997 Ltd, 51 primary cooperative societies and 14 Saving and Credit Societies (SACCOS). Strengthening of the SACCOS will allow for the establishment of community banks at ward and or village levels.

1.5.3 The Policy and legal framework

The Constitution of the United Republic of Tanzania recognizes the existence and operation of Local Governments in Tanzania. This aspect is explicitly stipulated in articles 145 and 146 of the constitution. The provisions in this document establish principles on how LGAs should discharge their functions. Ukerewe District Council's existence and its operations therefore are in conformity with the constitution of the country. Moreover, the Local Government (District Councils) Acts No. 7, 8 and 9 of 1982 were enacted to establish and allow for the operations of District Councils in Tanzania. Consequently, all LGAs comprise of a legislative organ i.e. the district council. In Ukerewe this organ is composed of 33 councillors where 24 of them are democratically elected from the 24 wards while 9 are women members nominated and then elected through special seats system by their political parties. There is only 1 Member of Parliament (MP) from the one constituency. The council operates through the three standing committees¹, namely:-

- The Finance, Administration and Planning Committee,
- The Education, Health and Water Committee, and
- The Economic service, Works and Environment Committee.

The executive organ of the council is composed of the District Executive Director as the chief executive who is assisted by ten (10) heads of departments and two heads of units. At the sub council level are the wards, villages and sub-villages. In each ward there is a ward development committee comprising of the elected councillors, village chairpersons and all extension staff operating at the ward level. The Ward Executive Officers (WEOs) are vested with administrative powers and all staff operating at ward level report to them.

Below the ward is the village. The village assembly is the highest decision making body at the village level. A village is composed of a number of sub-villages minimum of 5. Like the WEOs at ward level the VEOs are vested with administrative powers and all staff operating at village level report to them. Recently however Nansio was declared a township authority and this will change the administration and structure of the council slightly where some of the villages within Nansio town will be re-demarcated to allow for formation of 'mitaas'.

CHAPTER TWO

2.0 SITUATION ANALYSIS

2.1 AN OVERVIEW OF THE CURRENT SITUATION

During the second stakeholders' workshop it was established that the performance of the council was short in meeting the expectations of its stakeholders. A number of performance gaps in addition to those in the situational analysis report were also identified. In preparing this document therefore each department made an assessment of its performance making reference to the stakeholders' views regarding their satisfaction or dissatisfaction with the services being provided. Moreover, a SWOT analysis of individual analysis was carried out as well as a review of the current structure and resource requirement for making the structure operate properly compared to those available. This was then followed with a general SWOT analysis for the council.

2.2 SWOT Analysis Results for the UDC

SWOT analysis was undertaken by all heads of departments, some of heads of sections and units who participated in the strategic plan preparation exercise. Through brainstorming the following was the result of the analysis.

Strength

It was informed that the district is surrounded by Lake Victoria thus proving fresh water, fish and other lake foods for the community. Favourable climatic conditions that allow for various agricultural activities were also seen as strength to the district. Mentioned was also the existence of hard working people who are committed to their own development.

Weaknesses

In terms of weaknesses it was noted that there was weak or poor monitoring and evaluation of development projects which have resulted into poor implementation of various development project. Noted was also poor coordination of the council's activities due to weak or poor collaborative efforts among the different actors. Consequently, there are divisions among the staff where some HoDs are seen as poor performers while others are seen as good performers by community members, councillors and staff in general. In addition the following were noted:

- Weak financial base leading to inadequate financial resources,
- Shortage of qualified and competent staff particularly in the finance and other departments
- Unequal distribution of resources among the departments and sub council levels,
- Lack of a motivation and innovativeness for some staff leading to weak supervision and coordination of activities,
- Underutilization of and or improper utilization of the available resources such as vehicles, computers etc.
- Lack of staff development policy and training programme

Opportunities

Quite a number of opportunities were said to exist but which were not adequately exploited by the council. Such opportunities included Donor support, availability of financial resources from the Central Government such as the Capital and Capacity Building grants, TASAF and the LGRP, from financial institutions etc, including the Local

Government Loans Board. Moreover it was noted that there were resources and opportunities within the district which were yet to be tapped.

Threats

Among the threats that were identified included high rate of population growth and influx of people from other districts of Mwanza and neighbouring regions (Mara and Kigoma) which impact on the scarce arable land, resources and the environment, high rate of unemployment, wide spread of HIV/AIDS and environmental degradation.

2.3 Value for Money Studies and Cost Benefit Analysis

Since the process of preparing the strategy document started from the second stakeholders' workshop the outputs i.e. the strategies and performance indicators were firmed and confirmed. Moreover, the stakeholders could not come out with a comprehensive list of strategies and performance indicators due to time factor and their different background. The team that completed the exercise had to explore more strategies and performance indicators basing on the available information. Again these strategies and indicators had to be tested for value for money, their costs and benefits.

2.3.1 Value for money

The team was enlightened on how to carryout a value for money studies using service areas that were earmarked for outsourcing and or privatizing. Participants were informed that the essence for conducting value for money testing was to establish whether the activities and or strategies proposed would lead to:

- **Efficiency** i.e. reducing the inputs but retaining increased outputs
- **Efficiency** i.e. meeting the objectives.
- **Economical** i.e. result into lower costs.

An activity may be effective and efficient but highly uneconomical or economical but not effective. To shed more light on these practical examples were used for demonstration purposes. Modalities for service provision were extensively discussed and the reasons for privatizing or outsourcing explored in detail.

2.3.2 Cost benefit analysis

The concept of cost benefit analysis was also introduced by using proposed alternatives or strategies for agricultural extension services provision in the council. After a lengthy discussion it was suggested that the following strategies could be available:-

- To recruit extension staff at village level where one VAEO could be serving two to three villages.
- To train farmer trainers or facilitator who will use their farms for demonstration.
- To introduce farmer field schools at ward or village level depending on farmer population
- To prepare leaflets and radio programmes

The informed discussion that ensued resulted into an agreement that it would be more cost effective to opt for the farmer trainer/facilitator and farmer field schools. The following benefits were identified

- a) These two approaches would reduce the costs of hiring field extension staff including salaries and maintenance.
- b) It will be more effective and could result into increased productivity since farmers learn by doing, own the process and provides room for experience sharing and competition.
- c) It is sustainable as it reduces the dependency on field extension staff.
- d) Staff at the district level will be relieved of some of their functions related to human resource management and thus providing room for them to concentrate on key activities.

CHAPTER THREE

3.0 MISSION, VISION AND OBJECTIVES

3.1 DEVELOPMENT OF VISION, MISSION AND OBJECTIVES.

3.2 THE VISION AND MISSION

During the second stakeholders' workshop, the participants were able to develop **vision and mission statements** that were endorsed by the council as the overall direction of the operations of the council. While the vision describes the state or quality in which the community of Ukerewe expects to be in ten years time, the mission describes both the direction of the council's activities and the values to be upheld. Moreover, the vision is intended to create challenge, excitement and a common direction of the activities to be undertaken. Both statements were reaffirmed so as to ensure that they were in line with the Tanzania National Development Vision (TDV) 2025 and other national development strategies including the MDG, MKUKUTA to mention but some. Both statements were therefore improved upon and the result was the acceptance of the following as the council's vision and mission statements

Vision: The following considerations were taken into account while formulating the council vision.

- The TDV 2025
- Perceptions of stakeholder's aspirations during the workshop.
- Results of sectoral situational analysis of services being provided currently.
- Validity of the vision statement. Thus, the vision is:

Ukerewe DC strives to have a well educated community that is economically and socially well off, capable of meeting its basic needs and that lives in peace and harmony.

Mission is to deliver quality socio economic services through the people basing on their prioritised needs and by efficiently and effectively utilising the available limited resources.

3.3 Development of Objectives

Ukerewe district council like other Local Government Authorities in Tanzania is an implementing agency of the development vision 2025 and is therefore duty bound to equip it self with then capacity to be able to deliver the goals and objectives. Through the LGRP the council have been undergoing a restructuring process in order to meet the obligations facing it. The second stakeholders' workshop developed a vision and mission for the council. In addition the workshop identified performance gaps, objectives and strategies to achieve the vision.

The council objectives are as follows:-

- A. To improve services and reduce HIV/AIDS infections
- B. Access and Quality social services improved
- C. Quantity and Quality of Economic services and Infrastructure improved
- D. Good Governance and Administration services enhanced
- E. Management of Natural resources and Environment improved
- F. Social Welfare, Gender and Community empowerment improved

CHAPTER FOUR

4.0 STRATEGIES AND TARGETS

Objective A: To improve Services and Reduce HIV/AIDS infections

The rate of prevalence of HIV/AIDS in Ukerewe District stands at 12% well above the national rate of 7%. The major cause of the high rate is the nature of people's occupation fishing camps scattered over 38 islands.

The district is reachable from all corners by the lake transport this making it easier for non – resident to enter and leave the district at any given time. This arrangement facilitates the spread of HIV/AIDS given the life style that prevails at the fishing camps. To reduce the prevalence rate the council has set out the following strategic objectives:-

1. Voluntary counselling and testing centres for HI`V increased from current 2 to 5 by 2011.
2. Prevalence of HIV/AIDS in the District reduced from 12% to 7% by 2011.

These strategic objectives which are targets will be met when the activities detailed in the following page are elaborated.

Objective A: To improve Services and Reduce HIV/AIDS infections

S/N	Strategic Objective (Target)	Strategy	Activity	Objective Verifiable Indicators
1	Voluntary counselling and testing centres for HIV/AIDS increased from current 2 to 5 by 2011.	<ul style="list-style-type: none"> • Provision of more rooms • Mobile VCT and regular supportive supervision 	<ul style="list-style-type: none"> • Sensitization meetings to the community • Training of VCT councillors • To conduct mobile VCI services • To purchase HIV testing kits • To conduct supportive supervision 	<ul style="list-style-type: none"> • Number of VCT centres established.
2	Prevalence of HIV/AIDS in the District reduced from 12% to 7% by 2011.	<ul style="list-style-type: none"> • Community sensitization on the use of protective gears • Ensure use of safe blood for transfusion 	<ul style="list-style-type: none"> • To screen blood donors • To train 270 HSPs on IPC • To conduct health education to 74 villages on HIV/AIDS control • To train HSPs on STI management • To purchase 1 motor vehicle for supervision 	<ul style="list-style-type: none"> • Percentage of decrease of HIV/AIDS prevalence.

Objective B: Access and Quality Social Services improved

One of the core roles of local government Authority is to deliver timely and standard services to the people deliver timely and standard services to the people.

Areas of major concern under this objective include but not limited to:

- Increasing literacy rate
- Increasing the net enrolment rate
- Improving the learning and teaching environment
- Improving infrastructures
- Raising the rate of supply of safe and clean water to the people
- Offering extension services to communities engaged in various economic activities
- Providing plots to residents in urban centres and reducing incidences of land disputes.
- Improving treatment and care of common diseases of local priority like schistosomiasis and Mental illness
- Redacting of under five mortality rate from 137/1000 to 75/1000
- Reducing Maternal Mortality Rate from 209/1000 to 150/1000
- Reducing infant Mortality rate from 29/1000 to 15/1000
- Reducing prevalence of Malaria from 49.3% to 45%
- Reducing out break of epidemic diseases from 5% to 2%

103 Strategic objectives has been set in line with Council's wider objectives to meet these end. Various activities has been set out which will be implemented with performance indicators for easy verification at the of the period as detailed in the following tabulation:

S/N	Strategic Objective (Target)	Strategy	Activity	Objective Verifiable Indicators
1	Food services in 160 Primary school increased from 0% to 50% primary school in the district by 2011.	<ul style="list-style-type: none"> • Community mobilization on food services to primary schools 	<ul style="list-style-type: none"> • To conduct meetings at village level • Follow up and monitoring. 	Reports from school.
2	Group dealing with Eco- Tourism increased from 5 – 20 by 2011.	<ul style="list-style-type: none"> • Brochures to advertise the district. • Coordinate NGO, CBO, FBO and Group dealing with Tourism • Preparation of TV Programme. • Documentary for Eco – Tourism. 	<ul style="list-style-type: none"> • To collect various Eco – Tourism material. • To publish 25,000 brochures. • To train 800 Artists from NGOs, CBOs, FBOs and Groups dealing with Eco – Tourism to formulate different materials for Eco – tourism. • To initiate TV Programme • To produce a Documentary. • Study tour to Bagamoyo. 	<ul style="list-style-type: none"> • Improvement of Eco – Tourism.

Objective D: Good Governance and Administration services enhanced

In order to carryout various functions under local Government Authorities efficiently and effectively various actors need to undergo capacity enhancement through training to acquire the necessary skills to discharge those functions.

Apart from training and recruitment of various staff cadres required, strengthening ward and village tribunals by the council fall under this objective.

Training covers all the major levels of the organization (council, ward, village and community level).

S/N	Strategic Objective (Target)	Strategy	Activity	Objective Verifiable Indicators
1	Number of Qualified Pre – primary teachers increased from 7 to 53 by 2011.	<ul style="list-style-type: none"> • Communication with training institutes. • Advertising for the Pre-Primary short courses • Budgeting for training cost. 	<ul style="list-style-type: none"> • To send applications to institution. • To identify the Teachers to join the course. • to prepare Training Budget. • To pay fees to Training institutions. 	<ul style="list-style-type: none"> • School performance reports. • Teachers Attendance Reports • Acknowledgement receipt.
2	Supervisory skills to 170 school committees imparted by 2011.	<ul style="list-style-type: none"> • Preparation of seminar material • Communication with head teachers. • Identification of facilitators. 	<ul style="list-style-type: none"> • To conduct seminars • Monitoring and follow ups 	<ul style="list-style-type: none"> • Seminar reports

30	Ward tribunals in 24 wards and 74 village land tribunals strengthen by the year 2011	<ul style="list-style-type: none"> Engage trained staff to manage the tribunals Enhance efficiency and effectiveness of the tribunals Enhance effectiveness of village land tribunals Training WEOs and VEOs on their role as peace-keepers sensitize the Community on the demarcation of their responsibility Enlighten the community with the knowledge of laws Engage consultant Consult law and security bodies at District and regional level. 	<ul style="list-style-type: none"> To conduct Seminars to members of village land councils. To conduct training to secretaries of land tribunals on their responsibilities To purchase village maps To conduct training to WEOs and VEOs on their role of peace keeping. community sensitization To execute army training to teen ages To formulate Sungusungu groups in 74 villages. To promote the efficiency and effectiveness of peace and security committees in villages. 	<ul style="list-style-type: none"> A live ward Tribunals Employed trained staff in ward Tribunals Number of land disputes resolved. Minutes & Reports.

			<ul style="list-style-type: none"> • To conduct training to members to ward tribunals • To conduct seminars to UDC members • To conduct a ward tribunal secretaries study tour to districts which are already advanced in running ward tribunals. • To mobilise resources to enhance the efficiency and effectiveness of tribunals. 	
31	Ward offices increased from 4 to 20 and village offices from to 70 by the year 2011.	<ul style="list-style-type: none"> • Fund raising 	<ul style="list-style-type: none"> • Community mobilization • Monitoring 	<ul style="list-style-type: none"> • Ward and village offices in places. • Reports from Wards and villages.
32	Rate of meetings at ward village and sub – village increased from 15% to 100% by the year 2011.	<ul style="list-style-type: none"> • Sensitize the public to attend meetings • Enforcing the by law concerning the lower level meetings. 	<ul style="list-style-type: none"> • Community mobilization • To conduct seminars to WEOs and VEO on how to write meeting minutes. 	<ul style="list-style-type: none"> • Report from Wards and villages.
33	Livestock keepers field schools in 25 villages introduce by 2011	<ul style="list-style-type: none"> • Awareness creation on livestock keepers field school 	<ul style="list-style-type: none"> • Meeting with leader in 25 villages • Meetings with farmers • Identification of farmers dealing with field schools • Training of farmers on field schools. • Routine farm visit • data Collection/Analysis. 	<ul style="list-style-type: none"> • Presence of field school.

Objective E: Management of Natural Resources and Environment improved

The total area Ukerewe is 6,400 km² out of which only 640 km is land mass. With a population of 260,831 residents (2002 census) the population density then was 407 per km².

Wood fuel accounts for more than 90% of the primary energy consumed in the district. Fuel wood consumption per capital is estimated at 0.44 m³ per annum.

These figures indicate a great stress on the environment due to high fuel wood demand to satisfy domestic needs. This trend results into deforestation. Another area of concern is pollution of water sources especially Lake Victoria waters due to poor waste disposal systems in place.

Under this objective the council intends to:-

- Promote the use of improved cooking stoves;
- Promote tree planting activities district wide;
- Manage efficiently waste disposal;
- Legislate against all environmental malpractices;
- Sensitize the community on environmental management issues;

S/N	Strategic Objective (Target)	Strategy	Activity	Objective Verifiable Indicators
1	Environment conservation improved in 170 primary schools.	<ul style="list-style-type: none"> • Mobilization of school committees. • Short Trainings. 	<ul style="list-style-type: none"> • To conduct meetings with schools committees 	<ul style="list-style-type: none"> • Improved environmental conservation.
2	Hygiene of water sources improved from 50% to 75 % by the year 2011.	<ul style="list-style-type: none"> • Community mobilization • Water treatment and protection 	<ul style="list-style-type: none"> • To hold meeting with 300 water user groups. • To chlorinate water sources • Printing and distribution of leaflets. 	<ul style="list-style-type: none"> • Percentage increase in water hygiene.

Objective F: Social Welfare, Gender and Community empowerment improved

Ukerewe district has a population of 260,831 enumerated during the 2002 population census. among that population 131,989 were women (50.6%). This ratio of female is currently not reflected in economic activities and in service provision. for instance:-

	Total	Female %
• Pupils in primary schools	50,693	25,066 49.4
• Students in secondary schools	1,040	505 48.5
• No of councillors	33	9 27

In general women are under represented in various fields of economic activities a state which needs to be rectified in order to offer equal opportunity for both men and women to participate in the development process. This end will be met through:-

- Community sensitization on gender issues
- Counselling and guidance to girls
- Training of women economic groups on the issue of loans acquisition
- The details are described on the table below:

Objective F: Social Welfare, Gender and Community empowerment improved

S/N	Strategic Objective (Target)	Strategy	Activity	Objective Verifiable Indicators
1	Achievement of girls in Primary school education improved from 22.5% to 50% by the year 2011.	<ul style="list-style-type: none"> • Sensitization of the community on girls education • Providing remedial teaching • Providing guidance and counselling to girls. 	<ul style="list-style-type: none"> • To in cooperate the community through meeting. • To inspect the schools. • To strengthen guidance and counselling system. • Monitoring and follow up 	<ul style="list-style-type: none"> • Meeting reports • Guidance and counselling reports. • Improved daily attendance • Examination result reports.
2	Retention of girls' primary school education improved from 70% to 100% by the year 2011.	<ul style="list-style-type: none"> • Strengthening the inspection system and regulatory mechanism. • Strengthening monitoring system. 	<ul style="list-style-type: none"> • To inspect the schools • Follow up all inspected schools. • To build monitoring capacity to village leaders and schools committees. • counselling and guidance to girls. 	<ul style="list-style-type: none"> • School attendance reports. • Examination results • Guidance and counselling reports
3	Number of Health facilities practicing PMTCT increased from 2 to 5 by the year 2011	<ul style="list-style-type: none"> • Sensitization meeting to the community. • Imparting knowledge to the HSPs. 	<ul style="list-style-type: none"> • To conduct training to CHMT members on PMTCTS • To build monitoring capacity to village leaders and school committees. • counselling and guidance to girls. 	<ul style="list-style-type: none"> • Number of facilities providing PMTCT services.
4	Number of women economic groups increased from 60 to 150 by the year 2011	<ul style="list-style-type: none"> • Sensitization of Registration 	<ul style="list-style-type: none"> • To train 90 women economic groups on the essence of loans. • Monitoring and follow up of loan recovery. 	<ul style="list-style-type: none"> • Number of women economic groups

FINANCIAL PLAN FOR KEY RESULT AREAS:

The financial plan is being prepared with regard to activities developed from different strategies to achieve the targets set to every objective. Strategies will be employed by the departments and sectors within the district council to achieve the expected objective. Below is the financial plan on key areas of interventions.

OBJECTIVE A: To improve Services and Reduce HIV/AIDS infections

S/N	STRATEGIC OBJECTIVE (TARGET)	ACTIVITY	TOTAL	CONTRIBUTORS				
				UDC	COM	CG	DONOR	OTHER
1	1. Voluntary counselling and testing centres for HIV increased from current 2 to 5 by 2011.	Sensitization meetings to the community	939,355	0	0	939,355	0	0

CHAPTER FIVE

PERFORMANCE INDICATORS

Monitoring and Evaluation (M&E) of the Ukerewe District Council Strategic Plan is designed to ensure effective and efficient implementation of the Plan. The M & E system is instituted as a review mechanism to monitor the implementation progress and assess outcomes compared to the Vision, Mission and Objectives.

Monitoring

Monitoring of UDC Strategic Plan will be the overall responsibility of the UDC Reform Team CRT Working together with all Heads of Department.

Reporting

The reports will describe the achievements of all activities to be implemented.

Evaluation

There will be two types of evaluations of Strategic Planning Process at UDC, using internal evaluators and external evaluators. Both the internal and external evaluators will have the mandate to decide on other additional issues to be included or evaluated and agree with UDC in advance. This will be agreed at the first de-briefing meeting between the CRT and the evaluators.

The evaluation reports will be discussed at all levels at the be-annual progress meetings. The recommendations adopted will be implemented and included in the rolled over Strategic Plan.

MONITORING AND EVALUATION

Community involvement in the planning implementation monitoring and evaluation of the council's strategic plan is the major strategy adopted in preparing the present plan.

It is logically expected that during the various stages of the plan cycle, all stakeholders at all institutional levels will be involved in one way or another in their execution.

For easy monitoring and evaluation of the plan, the present institutional arrangement provided in the Local Government administrative set up will be used.

In each annual plan developed from the strategic plan, each activity to be implemented will show – what, where, when and who implements the activity.

By this arrangement it will be possible for each level to monitor and evaluate all activities implemented by lower levels of the administrative set up.

That process will start at household/group levels – council levels.

At Council level implementation reports will first be attended to by the CRT then forwarded to CMT through the standing committees of the council to the full council sitting before the information is dispatched to higher levels.

At village and council levels the public will be made aware of the plan implementation through the village assembly and full council meetings respectively.

This arrangement will ensure accountability at all levels and ensure community participation in the current and future strategic plans of the Council.
